## Introduction

Welcome to the Teacher's Guide to using iCue Tests & Assessments

In this guide, you will learn how to:

- Login and navigate the iCue environment

In Tests and Assessments:

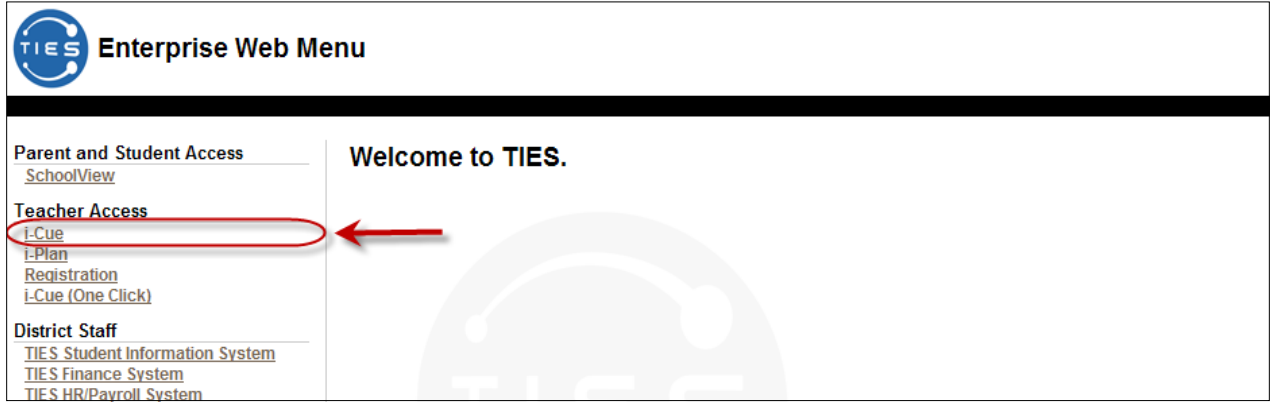

- Access and manipulate One-Click Reports
- Investigate student history for any student in a report with Student Link
- Create reports on a single student
- Create reports on a single test
- Create custom reports
- Use the Score Entry module
- Change the Roster as of date to reflect enrollment at different time points

## Logging In

You can access this login screen from the TIES Enterprise Web Menu:

- <http://asp.ties.k12.mn.us>
- Select the “i-Cue” link toward the upper half of the page

Login to i-Cue using your login information supplied by your district

**Log in**

District #:

User ID:

Password:

If you have access to multiple schools, you are taken to this screen after logging in.

If not, you will be taken directly to the screen on the following page.

If you decide to change schools after passing this page, simply mouse over “Tools” on the blue menu bar at the top of the page, and select “Change School”.

**Please Select a School Number**

Friday, October 29, 2010

# Tests and Assessments

Hover on the Tests & Assessments menu item and click on “One-Click Reports” to bring you to the Tests & Assessments Home Page

## Tests and Assessments Home Page

This is the Home page for iCue Tests & Assessments.

Notice the blue menu bar at the top of the page.

The home page also contains the list of One-Click reports that have been set up for your school.

To return to the home page from wherever you are, simply hover on “Tests & Assessments” in the blue menu bar and click on “One-Click Reports”.

If your school is a scheduling school, then you will have a list of classes to choose from in the drop down menu. Choose the class with the student(s) who’s scores you would like to see, and click on the name of the desired report.

If your school is not a scheduling school, all reports will reflect the students in your homeroom.

A screenshot of the 'Welcome to One-Click Reporting!' page. The page has a blue header with navigation links. Below the header, there's a welcome message and a note about filters. A 'Roster Date' is set to 05/05/2010. There are several filter sections: School (Sunny Slope Elementary), Teacher (Mauer, Joe), Classes (circled in red), Groups, Houses, Counselors, Grade, Ethnicities, Gender, Gifted And Talented, Title 1, Special Ed, and ELL. A yellow callout box with a blue arrow points to the 'Classes' dropdown, stating: 'The circled areas to the left are multi-function list boxes, you can click on it to scroll for your selection, or start typing'. Below the filters is a list of 'Available One-Click reports' including EARLY LITERACY, MAP MATH ALL, MAP MATH STRANDS, MAP RDG ALL, MAP RDG STRANDS, MCA-II MATH, MCA-II READING, MCA-II SCIENCE, DRF ENTRY, DRF HISTORY, and DRF PROG MDN. A 'Classes' dropdown menu is open on the right, showing a list of classes: ART 3 (3ART) - Section 1, BEHAVIORS 3 (3BEH) - Section 1, HOMEROOM 3 (3HOM) - Section 1, LANGUAGE ARTS 3 (3LAN) - Section 1, and MATHEMATICS 3 (3MAT) - Section 1.

## One-Click Reports

Clicking on one of the One-Click report buttons **MAP MATH STRANDS** (for example) will bring you directly to the corresponding pre-designed custom report

This example provides longitudinal performance on the Measures of Academic Progress (MAP) in Math. By default, the report will display the entire class, sorted by student name. You are also provided a set of filters, including gender, as well as all of the No Child Left Behind subgroups.

To filter your report, select the [Show Filter](#) link and choose the filters you would like, and click on the **GO** button.

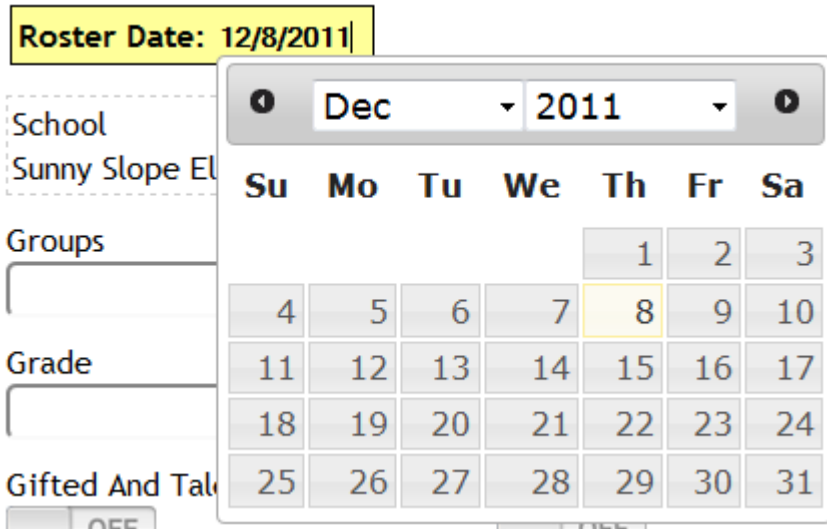

The screenshot shows the 'Tests & Assessments' section of the iCue system. A dropdown menu is open, showing 'One-Click Reports' with 'MAP MATH STRANDS - Strand Scores for Most recent M' selected. Below this, the 'Report Filter' section shows 'Roster Date: 5/5/2010' and filters for 'Schools: Sunny Slope Elementary', 'Teachers: Mauer, Joe', and 'Classes: ART 3 (3ART) - Section 1'. A 'Show Filter' button is circled in red. The main data table is titled 'MAP MATH STRANDS' and includes columns for 'Full Name', 'Student Id', 'Grade', and five 'MAP MATH SPR 2008-2009' RIT Score columns for different math strands. The table lists 15 students with their scores and demographic data like gender, ethnicity, and special education status.

### Roster date

If you click on the yellow **Roster Date: 12/8/2011** area, you will be brought to a calendar that you can change the date to view students enrolled on a particular date. This date always defaults to today. For optimal results, you should select information in the following order: Month, Year, then choose the Day.

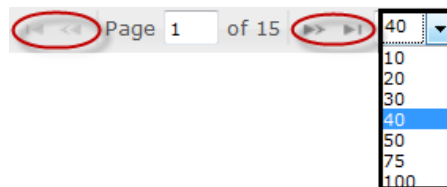

If you have not run a report yet, you will see the roster of students when you run a report. If you have run a report, changing the date will automatically re-run the report if the filter list is not expanded, otherwise you will need to select the **GO** button to view the results.

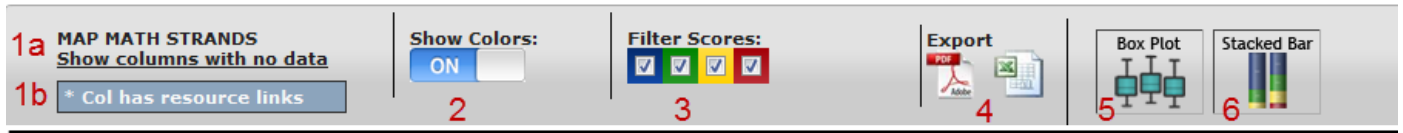

### Report footer

The report footer will let you know how many total students are in the list, plus if there are multiple pages, you will know how many pages you have to view. You can change pages by clicking on the arrows, or select the number of students you wish to view on each page (max is 100).

## Report options

1a. **MAP MATH STRANDS Show columns with no data** - this will remind you what One-Click report you are viewing and allow you to show all columns in the report (blank columns are suppressed).

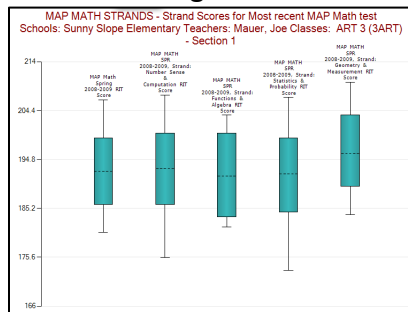

1b. **\* Col has resource links** - This means one or more columns have Resource links (e.g. DesCartes) and is denoted by a blue shaded column header cell.

2. **Show Colors: ON** - this allows the user to turn off any colors based on test scores in the report.

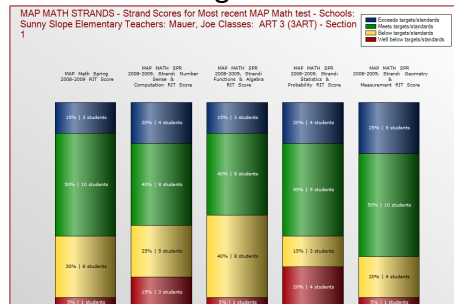

3. **Filter Scores:** - checking any of these boxes (all on by default) will filter out any student that does not have at least one score in the selected colors.

4. **Export** - you can export any list of students to a PDF (printer friendly) or MS Excel format.

5. **Box Plot** - you can view the results without seeing student names in a Box Plot graph.

6. **Stacked Bar** - you can view the results without seeing student names in a Stacked Bar graph.

### Sorting

To sort this report, simply click on the column header for the column you would like to sort by. Clicking the first time will sort results from lowest to highest, with blank cells appearing at the top. Clicking a second time will sort results from highest to lowest. This will be denoted by a  with the triangle indicating the sort direction.

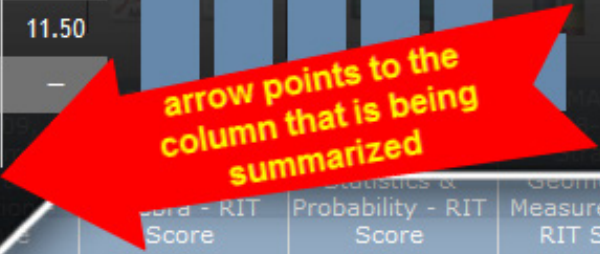

MAP MATH STRANDS Show columns with no data		Show Colors: <input type="checkbox"/>	Filter Scores: <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>	Export  	Box Plot 	Stacked Bar

  Henning, Abraham D	688100	03	190	189	190	188	192	M	White	

### Summary Statistics

To generate summary statistics for a column, simply click on the  icon to display. It will look like the sample below. No  icon means that there is not summary data available. To close, click on the X in the summary window.

	Total Tested	Min	Max	Avg	Median	St. Dev.	
All	20	20	166.00	212.00	192.40	194.00	11.47
Am Indian	2	2	166.00	197.00	181.50	—	15.50

Black	3	3	183.00	212.00	200.67	212.00	12.66
White	11	11	174.00	203.00	191.82	197.00	7.92
ELL	0	0	—	—	—	—	—
Spec Ed	2	2	166.00	189.00	177.50	—	11.50
Title 1	0	0	—	—	—	—	—
Gifted	0	0	—	—	—	—	—

## Pin (freeze) columns

You can pin (freeze) columns by clicking on the  icon. When that is clicked, all columns to the right will still scroll left to right, but the columns to the left of the pin (including the one with the pin) will not move.

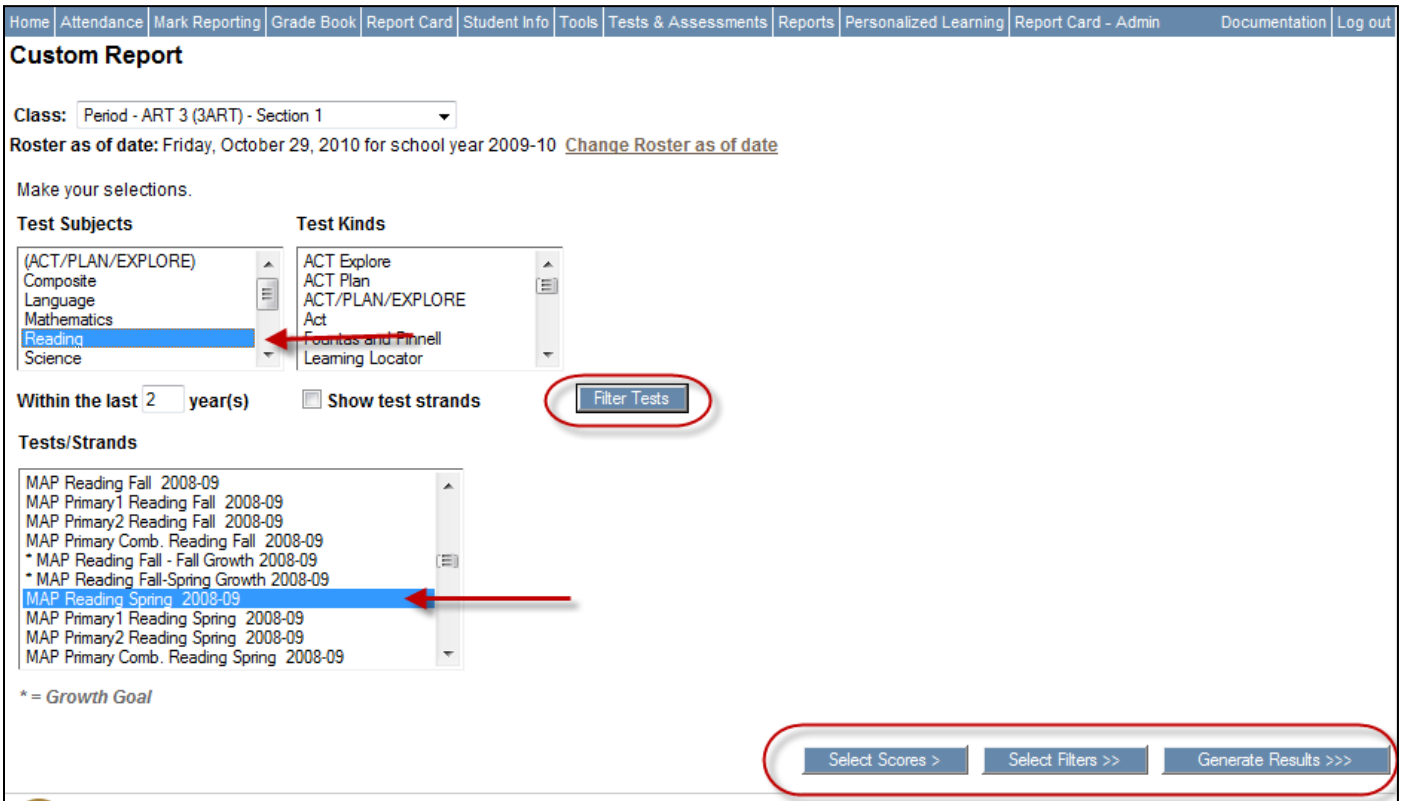

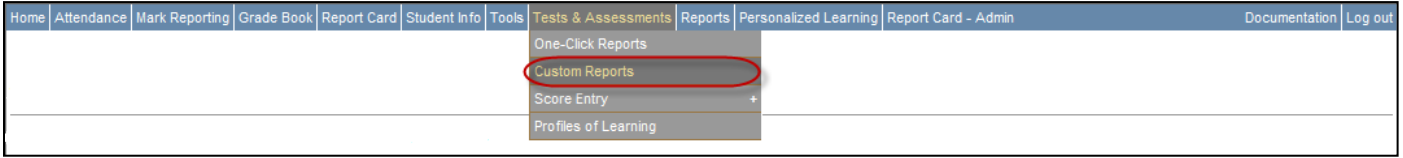

MAP MATH STRANDS Show columns with no data		Show Colors: <input type="checkbox"/> ON	Filter Scores: <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>	Export  	Box Plot 	Stacked Bar

## Custom Report

Clicking on “Custom Report” from the Main menu will take you to the screen shown.

This option will allow you to select a custom set of test results to view, see the following pages for more information on how to use this screen.

The list below “Tests/Strands” provides available tests to select for your custom report.

You can filter by “Tests Subjects”, “Test Kinds”, and “Within the last \_\_ years” to limit the number of tests and strands in this list. (Using the “Grade Levels” filter is not recommended, except by users experienced with the setup of their school’s Test Definitions in GS251)

Choose the desired filters, and click **Filter Tests** , to update the available list of tests and strands.

Note that multiple Tests and Strands can be selected for your custom report. On a PC, hold the Control key while selecting. On a Mac, hold the Apple key while selecting.

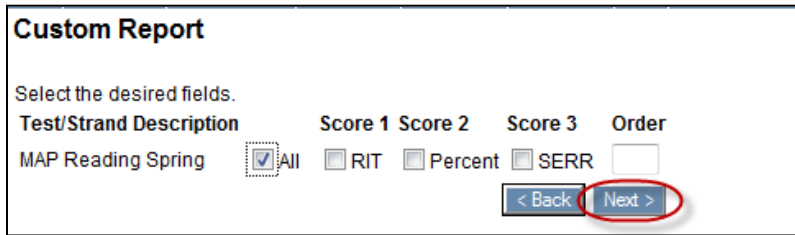

Select the desired Tests and Strands from the list provided – you may need to use the scroll bar to see the complete list.

Then click on **Select Scores >** to choose from specific scores within each test and strand (i.e., scaled scores, percentiles, etc.).

Or click on **Select Filters >>** to choose from specific scores within each test and strand (i.e., scaled scores, percentiles, etc.).

Or click directly on [Generate Results](#) to choose all scores for each test and strand selected.

Clicking on “Select Scores” from the previous screen will take you to this screen. Choose the desired scores by clicking on the checkboxes next to each score. Then click “Next”.

**Custom Report**

Select the desired fields.

Test/Strand Description	Score 1	Score 2	Score 3	Order
MAP Reading Spring	<input checked="" type="checkbox"/> All	<input type="checkbox"/> RIT	<input type="checkbox"/> Percent	<input type="checkbox"/> SERR

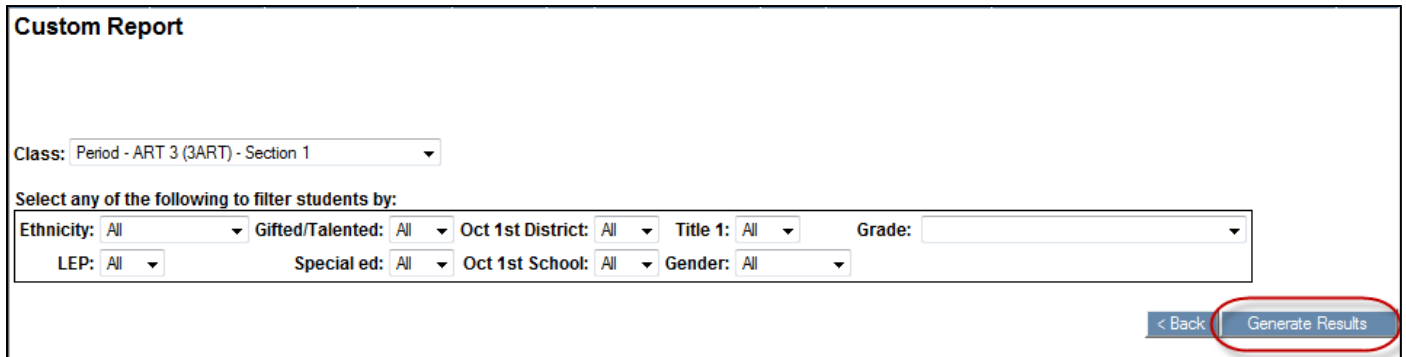

[< Back](#) [Next >](#)

If you selected the Select Filters option, you would be brought to this screen directly.

Choose any filters for your custom report on this screen.

These filters are the same as those shown earlier, in the One-Click reports. You may select a class, and you may select any of the filters for gender and the No Child Left Behind subgroups.

Choose your desired filters using the drop down menus, and click “Next”. Clicking “Next” without choosing a filter will provide a report on all students in the class selected.

**Custom Report**

Class:

Select any of the following to filter students by:

Ethnicity: <input type="text" value="All"/>	Gifted/Talented: <input type="text" value="All"/>	Oct 1st District: <input type="text" value="All"/>	Title 1: <input type="text" value="All"/>	Grade: <input type="text"/>
LEP: <input type="text" value="All"/>	Special ed: <input type="text" value="All"/>	Oct 1st School: <input type="text" value="All"/>	Gender: <input type="text" value="All"/>	

[< Back](#) [Generate Results](#)

Here is an example of a custom report. It is identical to the One-Click Reports in its appearance and available features.

### Roster as of date

All reports default to display data for all students enrolled in your class on the current date. In addition, characteristics of the students (i.e., grade, special education status) will reflect status as of the current date.

However, there are times when you may prefer to view data as of a previous date. For example, perhaps you would like to summarize the performance of your class on a specific test, based on the enrollment of the class on the date that test was given, rather than on current enrollment.

To do this, you must change the "Roster as of date", by selecting "Roster as of date" at the top of the page. Enter the desired date in mm/dd/yyyy format, and click "Change Date". Your report will refresh to reflect the date you have selected. Note that the date you have selected will also appear next to "As of date:" at the top of the page.

This will modify your report to reflect the enrollment of your class on the date selected.

## Score Entry

Home	Attendance	Mark Reporting	Grade Book	Report Card	Student Info	Tools	Tests & Assessments	Reports	Personalized Learning	Report Card - Admin
							One-Click Reports			
							Custom Reports			
							Score Entry		Multiple Student Single Test Entry	
							Profiles of Learning		Multiple Test Multiple Student Entry	

Two mass entry options are available:

1. **Multiple Student Single Test** – This mode allows a user to enter scores for a complete test (and all applicable strands) in a roster format.
2. **Multiple Test Multiple Student** – this mode allows a user to enter scores for tests comprised in a One-Click Report setup.

**\*\*\* in iCue – deletes are not allowed, only adds and changes. If a record needs to be deleted, someone with access to TSIS would need to make this correction.**

### Multiple Student Single Test

When the Multiple Student - Single Test module is used, only the tests that are allowed for iCue score entry (based on GS251 setup) will be displayed.

Once a test is selected, click on the View Test button to begin entry.

## StudentLink – Test History

You can quickly access more detailed information about a specific student, from any report.

Simply click on the small index card next to a student’s name to get more information on the student.

The Test History report provides a list of all test data available for the student. This report defaults to show the “All” column sorted by school year descending. All column headers can be clicked, to sort the report by that column. You will also have up to 5 additional tabs filtering the tests by test kind (Math, Reading, Science, Language, and Other tests). If the student is in Grade 9 or higher, you will also see a Grad Status tab showing the students status on the 3 subject areas (Math Reading and Writing)

## Overall

- Colors (blue, green, yellow or red) on a score means that your district has applied target scores for the given assessment.
- Hyperlinks on a score means that there is documentation available on the score given.

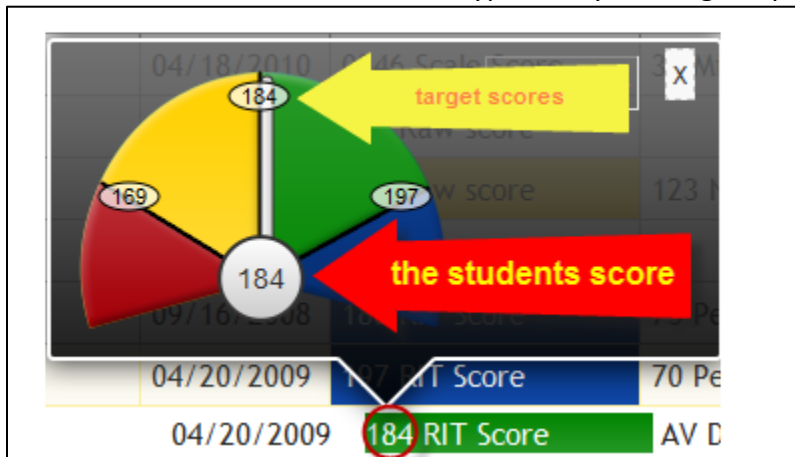

### Strand Data

In addition, tests that are accompanied by available strand data are expandable (+) links in this report. Click on the **+** next to the test to see the student’s strand performance on that test. You will see the complete test (overall and strands) when you click on the plus sign.

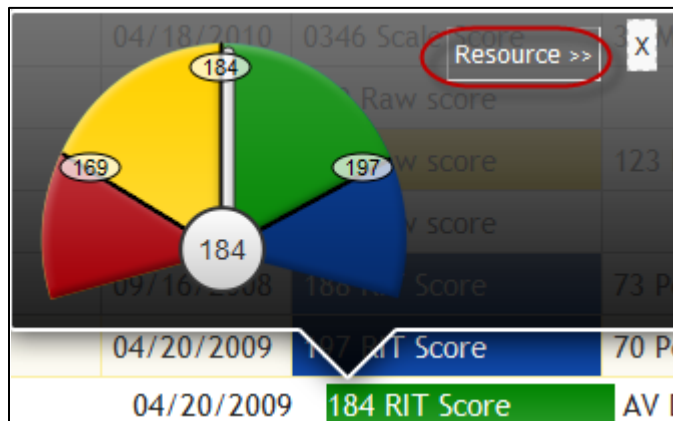

2009	MAP Reading Spring	04/20/2009	197 RIT Score	70 Percentage	3.30 Standard Error
	Word Recognition & Vocabulary	04/20/2009	184 RIT Score	AV Description	
	Comprehension: Informational	04/20/2009	200 RIT Score	HI Description	
	Comprehension: Narrative	04/20/2009	202 RIT Score	HI Description	
	Literature	04/20/2009	199 RIT Score	HI Description	
	Lexile	04/20/2009	0541 Lexile	0441 Lexile Minimum	0591 Lexile Maximum

### Target Scores/Resource Links

If you click on a score that either has a color or hyperlink, you will get a popup window.

If there are resource links available, you will see this link in the same window...Click on the link to open up the link (opens in a new window).

## Printing

You can print the complete students Test History by clicking the  button on the heading record
